SCM Sample Assignment Problem Statement (Task 1.1)

Title: Implementing Git Basics

Problem Statement: You are part of a small development team working on a project. To ensure efficient version control, you are tasked with performing and demonstrating the following operations using Git and GitHub:

Repository Setup and Initial Commit: Create a new GitHub repository for the project. Clone
the repository to your local system, initialize it with a main branch, and create an initial
commit that includes a file named project_overview.txt with a brief description of the
project

```
humi@BhumikaSharma MINGW64 ~ (feature-update)
/c/Users/bhumi
$ cd "C:\Users\bhumi\OneDrive\Desktop\Documents\git 1.1"
ohumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1 (featu
re-update)
$ git init
Initialized empty Git repository in C:/Users/bhumi/OneDrive/Desktop/Doc
uments/git 1.1/.git/
 phumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1 (maste
git clone https://github.com/bhumikasharma1409/SCM-project.git Cloning into 'SCM-project'...
Cloning into 'SCM-project'...
remote: Enumerating objects: 3, done.

 humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1 (maste
  cd SCM-project
 humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-pr
oject (main)
$ echo "This project contains details about subject SCM" > project_over
 humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-pr
$ git branch -M main
 humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-pr
 ject (main)
$ git add project_overview.txt
warning: in the working copy of 'project_overview.txt', LF will be repl
aced by CRLF the next time Git touches it
```

2. Branch Creation and Updates: Create a new branch named feature-update from the main branch. In this branch, add a file named feature_details.txt containing details of a new feature you plan to implement. Commit your changes to the feature-update branch

```
humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-pr
 ject (main)
 git checkout main
Already on 'main'
Your branch is ahead of 'origin/main' by 1 commit.
(use "git push" to publish your local commits)
ohumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (main)
$ git checkout -b Hello
Switched to a new branch 'Hello'
 humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (Hello)
$ git checkout -b feature_update
Switched to a new branch 'feature_update'
bhumi@BhumikaSharma MINGW64 ~<mark>/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)</mark>
$ echo "We can track file using this." > feature_details.txt
 humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)
$ git add feature_details.txt
warning: in the working copy of 'feature_details.txt', LF will be replaced by CRLF the next time Git touches it
bhumi@BhumikaSharma MINGW64 ~<mark>/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)</mark>
$ git commit -m "Have added new features in feature_details.txt"
[feature_update a0affd9] Have added new features in feature_details.txt
1 file changed, 1 insertion(+)
create mode 100644 feature_details.txt
 humi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)
$ git log --oneline
NOaffd9 (HEAD -> feature_update) Have added new features in feature_details.txtad57fc7 (main, Hello) Initial commit: Have added project_overview.txt
.064719 (origin/main, origin/HEAD) Add files via upload
```

3. Merge and Conflict Resolution: While working on the feature-update branch, simulate a merge conflict: o Modify the feature_details.txt file in the main branch. o Attempt to merge the feature-update branch into the main branch and resolve the conflict using Git Bash. o Commit the resolved changes to complete the merge

```
phumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)
$ git checkout main
Switched to branch 'main'
Your branch is ahead of 'origin/main' by 1 commit.
  (use "git push" to publish your local commits)
ohumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (main)
 echo "We can set reminders using this" > feature_details.txt
ohumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (main)
$ git add feature_details.txt
warning: in the working copy of 'feature_details.txt', LF will be replaced by CRLF the next time Git touches it
bhumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (main) $ git commit -m "Updated feature details"
[main be4cf69] Updated feature details
 1 file changed, 1 insertion(+)
 create mode 100644 feature_details.txt
bhumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (main)
$ git checkout feature_update
Switched to branch 'feature_update'
ohumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)
$ git merge main
Auto-merging feature_details.txt
CONFLICT (add/add): Merge conflict in feature_details.txt
Automatic merge failed; fix conflicts and then commit the result.
ohumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update|MERGING)
 git add feature_details.txt
bhumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update|MERGING)
$ git commit -m "Merged conflicts"
[feature_update 7692c6c] Merged conflicts
phumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)
 git log --oneline
 692c6c (HEAD -> feature_update) Merged conflicts
 e4cf69 (main) Updated feature details
 Oaffd9 Have added new features in feature_details.txt
 d57fc7 (Hello) Initial commit: Have added project_overview.txt
 064719 (origin/main, origin/HEAD) Add files via upload
```

```
<<<<<< HEAD
We can track file using this.
======
We can set reminders using this
>>>>>> main
```

(Note Pad Screenshot before resolving the conflict)

4. Repository Audit: Use Git commands such as git status and git log to review the repository status and commit history. Document the key actions performed, including branch creation, commits, merges, and conflict resolutions.

```
ohumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)
$ git status
On branch feature_update
nothing to commit, working tree clean
bhumi@BhumikaSharma MINGW64 ~/OneDrive/Desktop/Documents/git 1.1/SCM-project (feature_update)
$ git log
          2c6c94e280df6ff5a2f36b0d87256a7077244 (HEAD -> feature_update)
